Art Unit: 1614

Claims 1, 3-20, 29 and 33 are presented for examination.

Applicants' request for continued examination and response filed June 18, 2004 have been received and entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 4, the phrase "approximately" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any

Art Unit: 1614

inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3-20, 29 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chahwala et al. (D) in view of Foster (E) and further in view of Budavari et al. (R), all of record, for reasons of record as set forth in the Office action dated February 18, 2004 as applied to claims 1-20, 29 and 33.

Applicants' response stated on page 6, second paragraph, that the applicants have amended the broadest claim to incorporate therein the limitation of claim 2. However, the Examiner stated in the Advisory Action dated February 18, 2004 that claim 1 did not recite or reflect the applicants' optimal proportion of the enantiomers which maximizes the NO-induced effect of the R (+) isomer of amlodipine while still providing some of the antihypertensive effect of the S (-) isomer of amlodipine is in the range of 2:1 to 8:1. Once, again the claims are not limited to that optimized ratio as stated in applicants' response dated January 14, 2004 on page 7, lines 4-13.

Claims 1, 3-20, 29 and 33 are not allowed.
